### **Betting Operator**

#### **The Position**

We are seeking a Betting Operator to work on a variety of betting related content across a number of different sports. The Betting Operator's role is to produce and administer all betting related content including the monitoring and settling of markets.

You will be working within a dynamic team and will be involved in the launch of our exciting new betting exchange. Shift work including weekends and evenings will be standard in this role.

We are looking for someone who is enthusiastic about collaborative working and sharing of ideas and a willingness to learn.

We are a passionate, forward-thinking, innovative company where things are always happening. We're looking for people who work quickly, are competitive self-starters, smart and do what is needed.

#### **Responsibilities**

- Source accurate data feeds.
- Market creation when needed.
- Collate and enter data.
- Market Management- administer active markets.
- Check and update betting markets.
- Settle markets.
- Small scale trading through certain market lifespan.
- Seeding markets on a small scale (big events/matches).
- Website content creation and updates.
- Constant communication with development and other departments.
- Keeping track of TV channels, ensure TV sport schedules are up to date.
- Training of new operation staff members.
- Research into liquidity levels/future offerings.
- Escalate issues appropriately.
- Deal effectively with customer queries.
- Assist other teams across the organisation as required.
